

MRF Interim Supervisors Monthly Report February 4th 2016

The month of January at the MRF was still fairly warm and relatively quiet. Jobs done by Greg and I include:

- Accepting incoming garbage
- Receiving recyclables
- Sorting recyclables
- Baling recyclables
- Crushing glass
- Working hazmat
- Working on scrap metal
- Moving snow
- Smashing demo and construction boxes
- Working on equipment
- Separating old paint and stain
- Processing electronics
- Separating scrap wire
- Working on exchange building
- Answering phone calls and emails
- Retraining the public
- Plus our daily routine

Additional info:

1. The wire stripper is mounted and running. The actual process is slow and tedious but will in time pay for the machine and turn a small profit. The price of metals is fluctuating still so we will hold onto the high grade copper until we can get a fair price for it.
2. We have received a materials list and other information from Marissa who will be doing the electrical work at the MRF. I am planning to meet with her again this week to go over the final details and get her signature on the required paperwork.

Respectfully submitted,

Carey Baxter Interim MRF Supervisor
